- 255 x 180 x63mms (10 x 7.08 x 2.48 inches) unit dimensions
- IP65/IK08 enclosure rating
- Backlit 16 x2 White-on-Blue LCD
- Simple and easy installation
- Stand-along capability or full integration with Fire Alarm or Building
  Management control panel

Description

ADVLW-PRO is a cost effective, reliable water leak detection system which INCLUDES alarm point location to automatically provide a display of the distance along an installed length of detection cable where a leak has occurred. The flexible but rugged detection cable acts as a sensor along its entire length. "Nero" professional is ideally suited to protect mission critical equipment which is vulnerable to leaks. Early warning and location can prevent or drastically reduce costly downtime.

ADVLW leak detection cable comes in pre - terminated lengths for simple connection to the professional unit through the 10m/33ft fixed length calibrated leader cable.

Typical Applications

Data Centres	Fire Sprinkler Systems	Water Piping/drains Air	Conditioning drip pans
Control rooms	Clean rooms	Hotels	Schools
Condensation Drains	Heating/Cooling water supply	Overhead Pipes	Roofs & Basements
Telecoms: switches	Racked equipment	Offices	Commercial Properties
